

SAFETY MATS

Ref. 7031- Top cover : PVC

APPLICATION:

- ❑ Ideal for landings
- ❑ Intensive training of gymnasts
- ❑ Spotting

- ❑ Crash comfort compared with a traditional mat (softer)
- ❑ Safety mats are made from top quality materials for optimum cushioning and durability
- ❑ Reduced anxiety and stress during dismounts
- ❑ Excellent impact absorption
- ❑ Easy to transport
- ❑ Available in several different configurations (single density, dual density, stretch fabric top)
- ❑ Reduction in micro-traumas of ankles due to repetitions

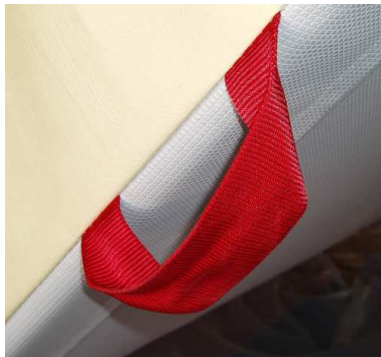

Ref. 7011 – Top cover: Jersey

TECHNICAL FEATURES

- ❑ Top cover: PVC or Jersey
- ❑ Different densities of polyethylene and polyurethane foam for different use
- ❑ Class M2 fire rating 1,000 denier “leather look” PVC cover, without phtalate
- ❑ Carrying handles
- ❑ Decompression holes or grids and reinforced corners according to the models

Joining hook and loop

Carrying handles

Reinforced corners

Integrated hook and loop models:

Use mats with hook and loop fastening to create acrobatics strips or club landing areas to your required lengths.
